

### Member's report on activities related to ICRI

Reporting period October 2013 - September 2014

#### 1. Updates on your activities.

##### Project 1

Cornerstone(s) implemented through the project	Check all that apply: <input checked="" type="checkbox"/> Integrated Management <input type="checkbox"/> Capacity Building <input type="checkbox"/> Science & Monitoring <input type="checkbox"/> Periodic Assessment (Review)
Project Title	<a href="#">Designation of Marine Protected Areas</a>
Location	<a href="#">UK waters</a>
Dates	<a href="#">Between October 2013 and September 2014</a>
Main Organizer(s)	<a href="#">UK Government</a>
Main Stakeholder(s)	<a href="#">Fisheries industry, environmental NGOs</a>
Description of Project (Please elaborate on how the project implements the FFA cornerstones)	The following recent Marine Protected Area designations have been made which support cold water coral reefs:  <a href="#">The Canyons MCZ (offshore, South-west England)</a> <a href="#">The Barra Fan and Hebrides Terrace Seamount MPA (Scotland)</a>
Outcome (Expected outcome)	<a href="#">These designations will support cold-water corals. The MPA network in UK waters is designed to conserve a selection marine species and habitats and offer long-term support.</a>
Lessons learned

##### Project 2

Cornerstone(s) implemented through the project	Check all that apply: <input type="checkbox"/> Integrated Management <input type="checkbox"/> Capacity Building <input checked="" type="checkbox"/> Science & Monitoring <input type="checkbox"/> Periodic Assessment (Review)
Project Title	<a href="#">Understanding and addressing the impact of threats to marine ecosystems in the UK Overseas Territories in the Caribbean</a>
Location	<a href="#">The research focuses on Anguilla, the Turks &amp; Caicos Islands, and the British Virgin Islands</a>
Dates	
Main Organizer(s)	<a href="#">This research has been carried out by Newcastle University, on behalf of the UK Government, and is due for publication shortly following review.</a>

Main Stakeholder(s)	
Description of Project (Please elaborate on how the project implements the FFA cornerstones)	The aim of this project is to increase our understanding of how to manage threats to marine ecosystems in the UK Caribbean Overseas Territories (OTs) and promote the development of solutions for addressing these threats. The project examines coral reef health in three UK Overseas Territories and combines natural and social science, working with local communities, to develop tailored options for sustainable reef management. The project will fulfil commitments in the UK Overseas Territories Biodiversity Strategy which sets out the UK Government approach to supporting biodiversity conservation in the OTs. The project addresses research priorities identified by the UK OT Governments, had full approval of and required ongoing cooperation with the relevant UK OT Governments, and the outputs will be made available to their representatives to inform management on the ground.
Outcome (including expected outcome)	
Lessons learned	
Related websites (English preferred)	

**2. Contribution to the ICRI Plan of Action and GM.**

**a. Engaging other sectors**

[Insert text here]

**b. Reef zoning for multiple use**

Location where a zoning plan has been implemented	
Year when the zoning plan was implemented	
Is the zoning plan accepted by the local community?	<input type="checkbox"/> Yes <input type="checkbox"/> No
Did the zoning plan cause conflicts among stakeholders?	<input type="checkbox"/> Yes <input type="checkbox"/> No
Did the zoning plan resolve conflicts among stakeholders?	<input type="checkbox"/> Yes <input type="checkbox"/> No
Has there been effective enforcement for stakeholders to follow the zoning plan?	<input type="checkbox"/> Yes <input type="checkbox"/> No
Overall, how would you rate the success of the zoning plan?	<input type="checkbox"/> Very successful <input type="checkbox"/> Somewhat successful <input type="checkbox"/> Not so successful <input type="checkbox"/> Unsuccessful
